

Oregon Data extracted from the National Survey on Drug Use and Health, released December 2020

The National Survey on Drug Use and Health (NSDUH) provides national and state-level data on the use of tobacco, alcohol, illicit drugs (including the non-medical use of prescription drugs) and mental health in the United States. Information from NSDUH is used to support prevention and treatment programs, monitor substance use trends, estimate the need for treatment and inform public health policy.
